

## MEETINGS & INCENTIVES FACTSHEET

# Kurumba

MALDIVES

## A True Original

Dotted with coconut trees that are the island's namesake, Kurumba was the first private island resort in the Maldives. Lush tropical gardens, white sandy beaches, and a vibrant House Reef are the hallmarks of this classic Maldivian resort. The thrill of first-time discoveries who knew the sea could be so turquoise, the sky so blue or an island so welcoming?

The resort will charm you with its unparalleled choice of dining experiences, recreation activities and entertainment while maintaining idyllic refuges and quiet spaces of relaxation to create the perfect balance for a holiday in paradise, perfect for honeymooners and families alike. Our team renowned for their warmth and heartfelt hospitality look forward to welcoming you to Kurumba Maldives, a home away from home where you can arrive as guest and leave as a friend.

## THE FIRST STEP – THE MALDIVES

**No of islands** : 1,192 beautiful coral islands spread across 26 natural atolls. It is one of the smallest Asian countries located in the Indian Ocean.

**Location** : The location of The Maldives is unique. The country is located on the Indian Ocean to the south of India's Lakshadweep Islands. It is located to the west of Sri Lanka and extends up to 823 kilometers. It is basically a group of islands situated close to the equator. This accounts for the hot and humid climate of the country.

The Maldives lies between latitudes 4 degree- 17 North and longitudes 73 degree- 50 East. The islands are located to the north of the Equator. Out of the 1192 islands, only 200 of them are inhabited. The islands are lowlands and none of them rise 6' above sea level. In ancient times, the country was a major trade center because it was located on the marine trade route on the Indian Ocean.

**Size of The Maldives** : The Maldives occupies an area, which is slightly more than 1.5 times the size of Washington, D.C. The country has a total coastline of 644 km the northernmost atoll is located around 110 km south of India's Minicoy Atoll, 480 km southeast of India's Cape Comorin and 649 km west of Sri Lanka. Male, the capital of the country, is located on the largest island in the Male Atoll. The island measuring nearly 2.5 square kilometers is the largest in the entire chain.

**Weather** : The Maldives location accounts for its hot climate. Its location close to the Equator clearly points out to the sun shining over for most part of the year.

## THE FIRST STEP – KURUMBA MALDIVES
